

Jason Buoni

Software Engineer

Who am I?

I am a polyglot developer with a Masters in Computer Science. I focus on full-stack development and enjoy learning about cyber security principles and machine learning. I also have experience with big data as well as DevOps.

Certifications

Scrum Certification, 2016 Scrum Alliance

Experience

March 2020 - Present

CallRail, Atlanta GA

Senior Software Engineer

- Working as a member of a scrum team to maintain CallRail related billing code in Ruby, Rails, and Angular.
- Participate in the mentorship program by helping mentor coworkers in Kubernetes, Angular, and SQL.
- Presented on XXS and IDOR attacks and prevention during CallRail security tech talks.
- Developed Typescript TypeORM prototype to help developers deploy and manage local Amazon EKS services.
- Migrated rake tasks to cron jobs to help with company shift to Amazon EKS.

September 2019 - March 2020

Honeywell, Atlanta GA

Senior Cloud Developer

- Using TypeScript, developed and maintained Honeywell Forge Platform APIs and CLI tools used to produce IoT applications.
- Use Openshift, Rancher, and Octopus Deploy to release development code into production.
- Using Docker and Kubernetes, updated Forge Platform to deploy using Honeywell's pipeline instead of through GitHub.

May 2015 - September 2019

Turner Broadcasting Inc., Atlanta GA

Senior Software Developer

- Worked as a member of a scrum team for multiple high visibility projects including the Elections System and Content Supply Chain.
- Worked with multiple languages and frameworks throughout the day such as NodeJS, React, Scala, Java, Python, and MongoDB.
- Created a new tracking system as a side project using Scala and Akka to replace multiple legacy systems.
- Spearheaded mentorship program for my department, which was incorporated to all intern positions for the GTO Tech Intern program.

June 2013 - May 2015
