EXPERIENCE

Veda Data Solutions, Madison WI (Remote)

Senior Software Engineer

Sept 2021 - Feb 2025

- Working as a member of a scrum team using Typescript, Postgres and AWS, architected and implemented a dynamic configuration system which would remove the need for most developer implementations on all customer related applications saving the company 250k per year in implementation costs.
- Working as a member of a scrum team using Python, DynamoDB, and AWS, developed and maintained our Velocity AI/ML data cleaning tools, and SDKs related to data enhancement and validation. Assisted in UI/UX design, performed delivery management, maintained security compliances, and assisted in DevOps related to AWS using the AWS Typescript CDK.
- Mentored junior and mid level developers through paired programming sessions and 1 on 1 mentorship. Helped to create and facilitate a front end and UX guild.
- Consistently ranked in the top 5% of performance metrics when measuring story points completed, merge requests, code written, and code reviews.

CallRail, Atlanta GA (Remote)

Senior Software Engineer

Mar 2020 - Sept 2021

- Working as a member of a scrum team using Typescript, AngularJS, Ruby, and Ruby on Rails maintained company code related to the billing platform.
- Working as a member of a scrum team using Typescript and AngularJS created a new series of logic components for the companies custom form controls.
- Participate in the mentorship program by helping mentor co workers in Kubernetes, Angular, and SQL, and presented on XSS and IDOR attacks and prevention during CallRail security tech talks.
- Developed Typescript TypeORM prototype to help developers deploy and manage local Amazon EKS services and configurations. Migrated rake tasks to Kubernetes k8 cron jobs to help with company shift to Amazon EKS.

Honeywell, Atlanta GA

Senior Cloud Developer

Sept 2019 - Mar 2020

- Working as a member of a scrum team using Typescript and NestJS developed and maintained Honeywell Forge Platform APIs and CLI tools used to produce IoT applications.
- Working as a member of a scrum team using Typescript and TypeORM to create a command-line tool to allow front-end developers to create, publish, and update NPM packages.
- Used Openshift, Rancher, and Octopus Deploy to release development code into production.
- Used Docker and Kubernetes to update Forge Platform to deploy using Honeywell's pipeline instead of through GitHub.

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

M.S in Computer Science

August 2018

EXPERIENCE

Warner Media, Atlanta GA

Senior Software Engineer

May 2015 - Sept 2019

- Working as a member of a scrum team using NodeJS, React, Scala, Java, Python, C#, and MongoDB created the new version of Warner Media's content supply chain which is used to supply HBO Max with content, as well as CNN and cable channel
- Using Scala and Akka, created a new internal job monitoring system as a side project. The project was put into production saving the company 80k per new pipeline implemented.
- Spearheaded the mentorship program for my department, which included the interviewing, hiring, management, and general mentorship of two interns a quarter. The mentorship process I uses was reviewed highly and was eventually implemented for all of the GTO Tech Intern program.
- Working as a member of a scrum team using NodeJS, Backbone, and Java, maintained and updated the CNN election related technologies which are used to broadcast the US elections, and to update the CNN websites election related content.
